Conspiracies, Theories, Secrets of 9/11 sold over 100,000 copies in the German original. Veteran journalist Broeckers was at work on a study on conspiracy on Sept. 11, giving his book a unique depth and viewpoint. Leading into a blow-by-blow 9/11 diary, Broeckers tells the history of conspiracy from the Templars to the Mafia and the NWO, with hints on judging which theories are valid. His new science of “Conspirology” explains puzzles of cooperative competition, from evolution to the drug trade. With a light touch of wit and sophistication, *Conspiracies* is a treat to read. June 2006, 286 pages, ISBN 0-930852-23-0, **\$14.95.**

Truth Jihad: My Epic Struggle against the 9/11 Big Lie. One of a kind: the first humorous book on 9/11, and outrageously so. Barrett sends critics like Fox News, the Secret Service and neo-con politicians packing. Sparkles with insights on academic freedom, bigotry, 9/11 and media blindness. Kevin Barrett, skeptical scoffer and confirmed tippler, meets a Moroccan beauty and converts to Islam. When he realizes the awful truth of 9/11, he decides to expose it, no matter the cost – which turns out to be his livelihood as a university lecturer. April 2007, ISBN 0-930852-99-0, 224 pages, **only \$9.95.**

Painful Questions: An Analysis of the September 11th Attack. The groundbreaking study that proves explosives, not airplane crashes, caused the collapse of the Twin Towers and the hushed-up fall of Building WTC 7 on 9/11/2001. Inevitable logic, common-sense physics and over 100 photos and figures, many in full-page color, demolish the WTC scam. Author Hufschmid is also one of the few who write about the psychology of mass deception. “Whether the government is complicit or incompetent, we have a serious problem.” 4th ed. 2005, 160 pages, 8½ x 11, ISBN 1-931947-05-8, **\$25.00.**

9-11 on Trial: The WTC Collapse is the culmination of several years of diligent investigation by numerous independent journalists and scientific researchers into what really happened – and what did not – on 9/11/2001. The proof of controlled demolition is in from all angles: collapse of all three towers at the free-fall speed of a drop through air; images and sounds of detonations; expert opinions; eyewitness accounts; temperatures of burning jet fuel vs. resistance of steel to heat; evidence tampering; seismic records. All the marks of demolition are found, and there is no precedent of collapse from fire. June 2006, 170 pages, ISBN 0-930852-87-7, **\$12.95.**
